DREAMERS

THE KEEPER

TEASER

FADE IN:

EXT. THE IN-BETWEEN - NIGHT

STATIC. WHITE NOISE. Like an analog TV channel that's not all the way tuned in.

It's the layer of energy between the physical world and the Dreamscape. For most life forms, a short-term place of quick escape.

However, for IAN (20s, handsome in an easy rider sort of way), the Anti-Source and a true origin of evil, it's his prison.

Ian sits on the gray floor. Eyes closed. Concentrating.

His body FADES slightly from view.

EXT. MILKY WAY GALAXY - CONTINUOUS

Astroid belts. Stars. Space debris.

Looking closer....

Sun. Mercury. Venus. Earth. Mars. Jupiter. Saturn. Uranus. Neptune. Pluto.

ATLANTA (V.O.)
Life and death...

EXT. PLUTO - CONTINUOUS

Named after the Roman God of the Underworld.

A mantle of water ices over the rocky surface.

Currently within the twenty year orbiting cycle that places it within Neptune's orbit.

INT. PLUTO - CONTINUOUS

ATLANTA (V.O.)
 ...Creation and destruction...

Ian's astral body becomes more dense, but does not turn solid.

From around Ian, BLACK ENERGY rapidly expands to equal the POWER of 25 MILLION NUCLEAR WEAPONS detonating simultaneously.

EXT. PLUTO - CONTINUOUS

Seen from space, the planet rocks with an IMMENSE SHOCKWAVE.

Twenty-nine sextillion tons of dirt and rock hurl into the atmosphere.

ATLANTA (V.O.)
 ...Are a delicate balance...

The explosion propels Pluto's debris into...

EXT. NEPTUNE - CONTINUOUS

The gas giant SLINGSHOTS Pluto's debris around Uranus.

ATLANTA (V.O.)
 ...To maintain the existence of --
 well -- everything.

EXT. CHUNKS OF PLUTO - CONTINUOUS

On a trajectory around the other planets towards Earth.

ATLANTA (V.O.)
 The slightest disruption, however
 unassuming, can have the most
 devastating consequences.

INT. HUBBLE TELESCOPE - CONTINUOUS

Picks up the explosion and the incoming debris. Transmits the data to...

EXT. GODDARD SPACE FLIGHT CENTER - NIGHT

Main gate on Greenbelt road. White sign with blue letters that reads: NASA Goddard Space Flight Center.

Home of the Hubble Telescope's data and interpretation.

INT. GODDARD SPACE FLIGHT CENTER - DATA CENTER - CONTINUOUS

ENGINEERS pour over reports. MONITORS relay data.

In the back corner a well-dressed data analyst, VIGGO TAYLOR (20s, a handsome Brit) and DR. ZEEK HUMBERT, PhD (30s, a FBI wannabe) look at the latest data from the Hubble Telescope.

ZEEK

This'll get her attention.

VIGGO

How long do you think it'll take?

EXT. WINDING COUNTRY ROAD - VERMONT - NIGHT

Surrounded by TREES on both sides of the road.

A RED SUV drives down the road.

A SHIMMER OF LIGHT. ATLANTA MILES (20's, a dark-eyed beauty) dressed in BLUE JEANS, RED SHIRT, SHOES; with a SPARKLE OF LIGHT on a pendant around her neck, walks out of "thin air" in to the middle of the road.

Atlanta turns and sees the SUV a split second before it hits her.

The force throws Atlanta over the vehicle and onto the road.

CUT TO BLACK.
